

$$\sin \theta = \sin \alpha$$

$$\implies \theta = n\pi + (-1)^n \alpha, \quad n \in \mathbb{Z} \quad (1)$$

$$\cos \theta = \cos \alpha$$

$$\implies \theta = 2n\pi \pm \alpha, \quad n \in \mathbb{Z} \quad (2)$$

$$\tan \theta = \tan \alpha$$

$$\implies \theta = n\pi + \alpha, \quad n \in \mathbb{Z} \quad (3)$$

$$\sin^2 \theta = \sin^2 \alpha$$

$$\implies \theta = n\pi \pm \alpha, \quad n \in \mathbb{Z} \quad (4)$$

$$\tan^2 \theta = \tan^2 \alpha$$

$$\implies \theta = n\pi \pm \alpha, \quad n \in \mathbb{Z} \quad (5)$$

$$a \cos \theta + b \sin \theta = c$$

$$\implies \theta = 2n\pi + \phi \pm \beta \quad (6)$$

$$\tan \phi = \frac{b}{a}, \quad \cos \beta = \frac{c}{\sqrt{a^2 + b^2}}$$
